HeatMap

FILTER

7 Tree Map

→ This Assignment requires the use of things like which doesn't natively support Tree Maps.

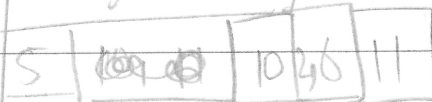

4 Pie Chart

→ Pie Chart is very bad at allowing users to compare values.

⑨ Bar & Whisker Plot

The data doesn't have much variation thus not required.

Categorise

Combine & Refine

5. The Map will be used to show the migration for each state of Australia.

10 Multiple Line Chart will be used to show time series data overtime and how each Visa Category varies.

2, 6 Bar Chart & Horizontal Bar Chart can be merged as the both offer the same benefit but horizontal is better for comparing.

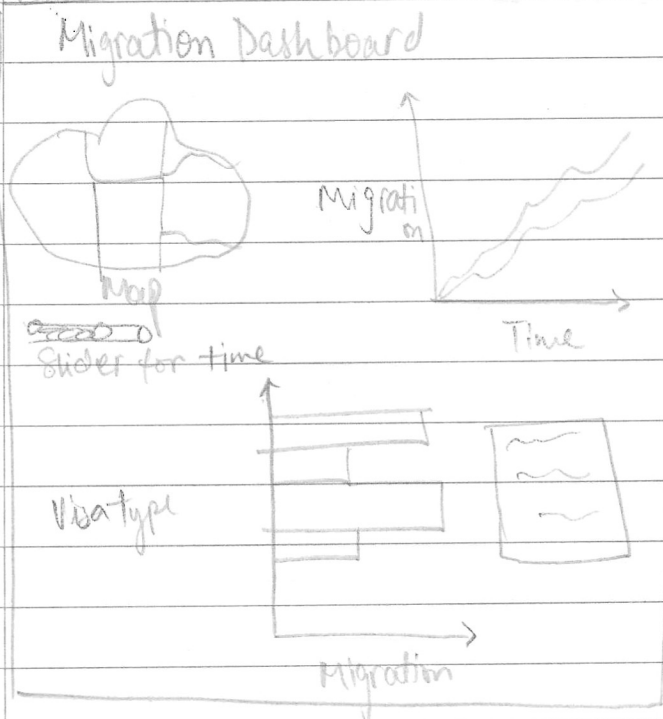

Questions

→ Is Map & line chart both showing history required?

→ Does the area chart need to be sorted.

→ does horizontal bar chart show enough information?

LAYOUT

FOCUS

Current Migration State →
 Migration over time →
 Components of Migration

Focus on the current state of migration by looking at State by State comparison in the Map.

Focus: The Slider will allow users to compare the migration among the states over the years.

INFO

Title: Australian Migration
 Author: Tejeshwi Sanyal
 Date: 21/10/2025

Sheet No. 2

Operations

- Users can hover over graph components to see more information to see more details. Tooltip will show the relevant information in a formatted way.
- Users can click on legend to filter by keys.

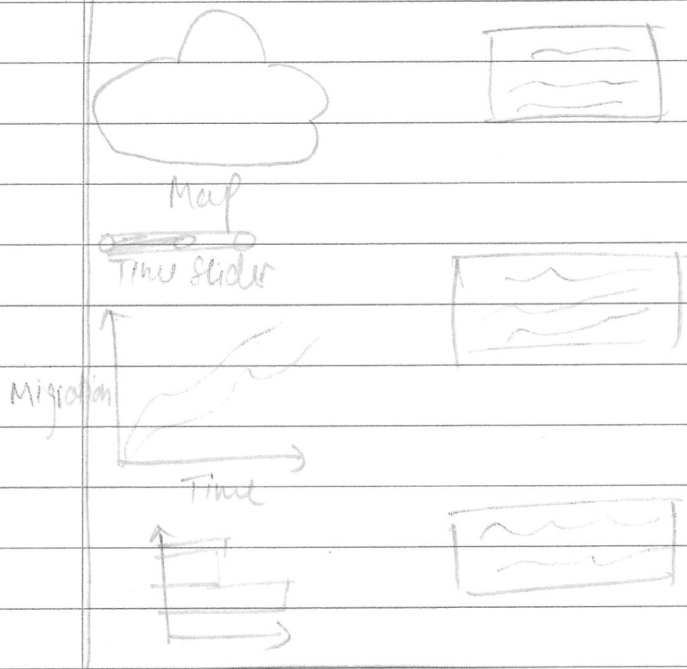

Discussion

Strengths:

- Clear order will show how migration progressed in Australia
- Map will allow users to relate to the information as they are familiar with the states.

Weaknesses:

- Needs more info about visas doesn't tell the whole story.

LAYOUTFOCUS

→ This design heavily focuses on the text explanations which provide extra context.

→ The straight linear order of visualisations down the left which create clear order in which the visualisations are to be viewed.

 Sheet No: 3

OPERATIONS

- Tooltip → Display relevant information in formatted way.

- Filter → Time slider for map.
 - Annotations.

DISCUSSIONS
Strengths:

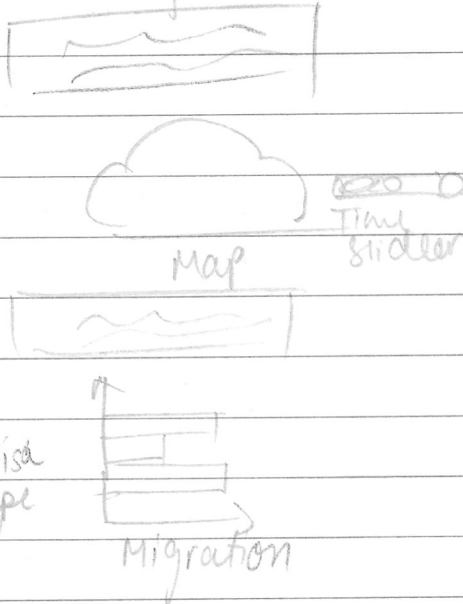

→ Clear hierarchy allows users to stay focused on each visualisation.
 → Text information allows users to stay informed so they can understand the visualisations properly.

Weaknesses:

→ Too much Text might bore the user.

LAYOUT

Australian Migration

INFO

TITLE: Australian Migration

Date: 21/10/2025

Sheet: Sheet 4

OPERATIONS

- TOOLTIP: Provides relevant info about each visualisation in a formatted way.

→ Filters: Time slider for map

→ Text Annotations

FOCUS

- This layout tells the story of what the Australian migration looks like and what these migrated people come here to do.

- The text before each visualisation creates the pairs with each visualisation to provide the user context.

Discussion Strengths:

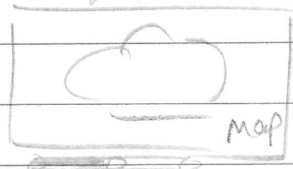

→ Clear hierarchy will allow users to retain focus on one visualisation at a time

→ The text would provide the right content that they need to decipher the visualisation.

Weakness:

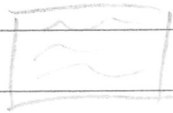

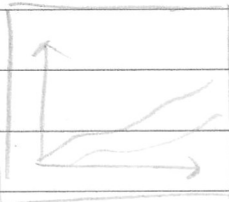

→ The unchanging layout of text than visualisation would get repetitive.
